The screenshot shows the Microsoft Azure portal interface. At the top, there's a search bar and navigation icons. The breadcrumb trail indicates the user is in a resource group. The left sidebar contains navigation links for Overview, Activity log, Access control (IAM), Tags, Events, Settings, and Monitoring. The main content area shows the 'Essentials' section with subscription details and a table of resources. A red box highlights the 'Delete resource group' button in the top toolbar. The table lists resources such as App Service plan, SQL server, SQL database, Function App, Application Insights, and Storage accounts, all located in Korea Central.
